Profile

Full-stack developer (B.Tech Computer Science, 2026) who ships production-grade web applications end-to-end — **React.js** / **Next.js** front-ends, **Node.js/Express REST APIs**, and relational/NoSQL data layers, deployed on **AWS**. Track record of owning features from UI through API to database schema: 17-endpoint API surfaces, real-time WebSocket systems, and secure payment/identity integrations, all shipped in Agile, Git-based workflows. Additional depth in interactive 3D/WebGL interfaces (Three.js, React Three Fiber).

Technical Skills

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS

Backend & APIs: Node.js, Express.js, RESTful APIs, WebSockets, React Hook Form + Zod

Databases: PostgreSQL (PostGIS), MongoDB, Redis, SQL, Prisma, Drizzle ORM

Cloud & DevOps: AWS (EC2, S3, Cognito, CloudWatch, IAM), Docker, Linux, Git, CI/CD

3D & Interactive Graphics: Three.js, React Three Fiber, GSAP (ScrollTrigger), WebGL

UI Systems & Tools: shadcn/ui, Radix UI, Figma, component-based design systems

Projects

Rentiful — Cloud-Based Rental Platform

GitHub

- Architected a full-stack rental platform (**Next.js**, **Express**, **PostgreSQL/PostGIS**) with role-based access for 2 user types (tenant/manager) and **AWS Cognito** authentication.
- Shipped **17 RESTful API endpoints** spanning properties, applications, and leases with Prisma-modeled schemas; built a Mapbox-powered geolocation search with automatic address geocoding.

QuickShow — Full-Stack Ticket Booking Platform

Live

- Shipped a full-stack ticket-booking platform handling real-time seat reservation, **Stripe** payments, and **Clerk** authentication end-to-end, backed by **MongoDB**.
- Engineered 10-minute time-boxed seat holds with automatic release via **Inngest** event-driven workflows, plus fully automated booking-confirmation and 8-hour pre-showtime reminder emails via Brevo/Nodemailer.

Sportz — Real-Time WebSocket Backend

- Engineered a real-time sports backend pairing REST APIs (matches, commentary) with a **WebSocket** layer supporting per-match subscribe/unsubscribe, broadcasting live match and commentary events to every subscribed client.
- Backed the system with **PostgreSQL** + Drizzle ORM for persistence, Zod for request validation, and Arcjet for WebSocket connection security.

MacBook Parallax Studio — Interactive 3D Product Showcase

Live

- Built a real-time 3D product showcase with **React Three Fiber** (Three.js/WebGL) rendering, choreographed with **GSAP** scroll-synced animation sequences.

Experience

Software Engineer Intern, Agaamin Technologies — Gurugram, India

June 2024 – Aug 2024

- Architected and shipped a secure 2-step Aadhaar-verification flow (domain lookup → OTP-verified submission) — **React.js** frontend paired with a **Node.js/Express** backend handling OTP verification and identity association, live in production.
- Built **2 production REST API endpoints** powering UPI payment-detail retrieval, enabling one-click payment initiation tied directly to a user's verified domain identity.
- Owned the platform's **AWS** footprint end-to-end: EC2 production deployment and environment configuration, plus S3 storage locked down with IAM user-based access control.

Education

BML Munjal University, B.Tech in Computer Science

Sept 2022 – October 2026

Certifications: MERN Stack — Hero Vired | AWS Fundamentals — Coursera
