Technical Skills

Frontend: JavaScript (ES6+), TypeScript, React.js, Next.js, HTML5, CSS3
Visualization & Graphics: Three.js, GSAP, WebGL fundamentals, CSS 3D Transforms
Backend (Supporting): Node.js, Express.js, C#
Databases: PostgreSQL, MongoDB, Redis
Cloud & DevOps: AWS (EC2, S3, RDS, CloudWatch), GitHub Actions
Tools & Design: Prisma, Blender, Mapbox, Socket.io, Linux, Figma

Certifications

AWS Fundamentals — Coursera

Experience

Software Development Engineer Intern, Agaamin Technologies — Gurugram, India June 2024 – Aug 2024

- Built production-grade frontend tooling using **React.js and Next.js**, improving internal workflow efficiency.
- Developed data-driven UI components and optimized rendering performance, reducing page load times by **45%**.
- Collaborated with backend engineers to integrate APIs into frontend visualization layers.
- Deployed and monitored production builds on **AWS**, improving system reliability and uptime.

Projects

Rentiful — Multi-Role Web Platform GitHub

- Designed and maintained **internal tenant and admin dashboards** with **role-based access**, handling **data-heavy views, complex state management, and performance considerations**.
- Built a role-based web application using **Next.js, TypeScript, PostgreSQL (PostGIS)** with geolocation-driven UI via **Mapbox**.

BookWise — University Library Management System Live Demo

- Built an **admin panel for library clerks** to manage inventory, users, and transactions, focusing on **reliable CRUD workflows, caching, and low-latency data access**.
- Architected the system using **Next.js, TypeScript, PostgreSQL, and Redis**.

MacBook Product Experience — Apple-Style Interactive Frontend Live Demo

- Implemented a **performance-sensitive, data-driven UI** with scroll-linked state updates, optimizing **render cycles, animation timelines, and frame stability**.
- Focused on **UX polish and cross-browser performance** in a continuously updating interface.

GPUlytics — Real-Time System Monitoring & Visualization Tool GitHub

- Visualized high-frequency system telemetry using **React**, emphasizing **efficient re-renders and UI responsiveness under continuous updates**.
- Integrated streaming metrics pipelines with **Python, Flask, NVML, and AWS**.

Education

BML Munjal University, B.Tech in Computer Science Sept 2022 – Present
Relevant Coursework: Data Structures, Algorithms, Operating Systems, Database Management Systems, Computer Networks
